

Everything your device or app needs for approval, in your own cloud

One system instead of a regulatory consultant, a QMS consultant, a security firm and a cloud team. We find the rules your product must meet and give you the cloud and quality system to meet them.

Compliant cloud and QMS

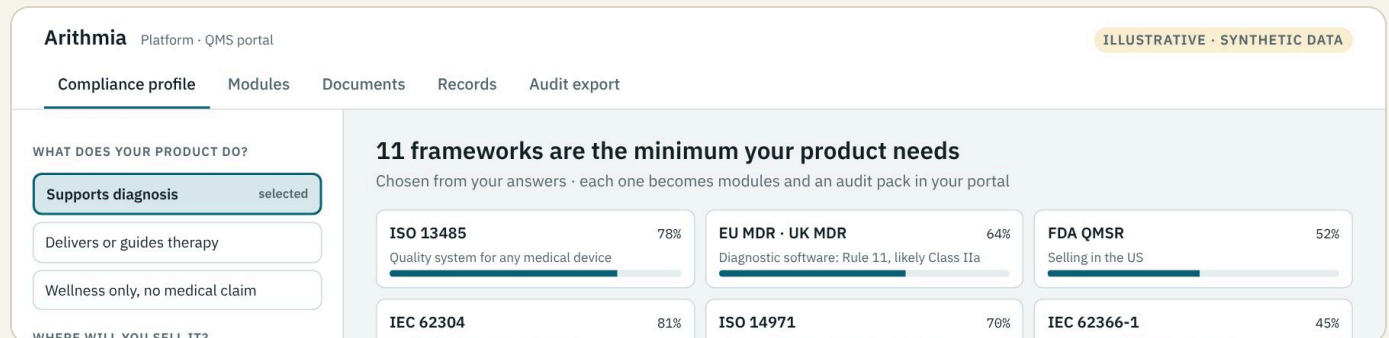

→ ARITHMIA PLATFORM

- ✓ **A quality system built for your product:** only the modules its rules require
- ✓ **A compliant cloud set-up:** encryption, backups, access control, tamper-proof logs, UK or EU data residency
- ✓ **In your own AWS or Azure account:** your app and data never come to us

Daily proof you're compliant

→ ARITHMIA CHECK

- ✓ Connects read-only to your cloud account; nothing to move
- ✓ UK GDPR, NHS DSPT, ISO 27001, Cyber Essentials and DTAC checked every day
- ✓ Sealed evidence an auditor can trust, and the fix for any failed check

We pick the rules that apply: the minimum set for a diagnostic app sold in the UK, EU and US. Shown with sample data.

	THE USUAL WAY	WITH ARITHMIA
Which rules apply	A regulatory consultant	We work it out for your product
Cloud and security	Cloud engineers and a security firm	Ready-made, in your own cloud
Quality system	A QMS consultant and a separate eQMS	A QMS built for your product
Audit evidence	Gathered by hand before each audit	Recorded every day

Start with a readiness assessment, including your cloud architecture

£4,950

Health and wellness app · 3–4 weeks

£8,500

Software as a medical device · 4–6 weeks

£12,500

Medical device, with or without software
